

Virtual Health Fair

Hosting an online event with real benefits has never been easier.

With more and more employees working remotely, virtual event resources are more important than ever. To help our clients and partners meet this need, Navigate's platform can now host Virtual Health Fairs! This online resource takes the key aspects of an on-site event—presentations and supporting materials—and allows participants to attend at any time.

How it Works

Navigate's flexible digital platform allows us to deliver videos, messages, learning courses, presentations and supporting materials to your employees. **We do this efficiently, inexpensively and in coordination with you:**

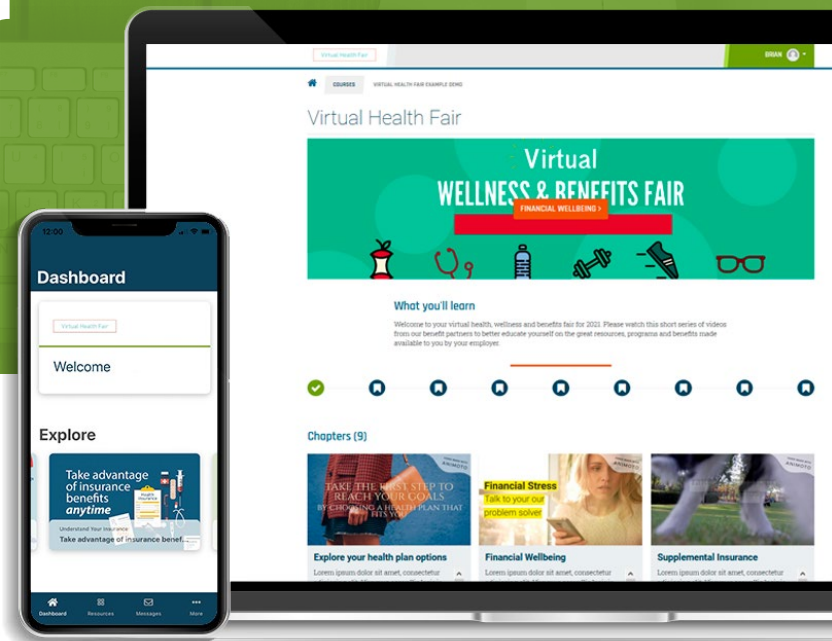

- Your HR team will identify vendors/partners and collect their resources, just as they would at an event booth.
- Each vendor's materials are placed in a series of videos that participants can watch at their convenience. If a partner does not have a video, an additional link section is made available on the platform.
- Standard pricing includes 15 vendors and additional vendors can be added in blocks of five.

Implementation Timeline

Implementation takes between 30 and 60 days, most of which is spent collecting vendor/partner videos and materials. (All materials for the event must be provided to Navigate at least 10 business days before the opening day of event.)
